

Famos robotic® - License Assistant

The License Wizard allows you to update and create software licenses. It is required to extend the software maintenance, to unlock an additional option or to create a trial license.

Starting the License Assistant

Open the Start menu and start the program "Famos V9 x64 - License Assistant" from the program group "Famos V9 x64".

License Tickets

Whenever a license is to be changed or created, a license ticket is required. It always consists of a group of five with five characters each.

Tickets for CM-Sticks

If the license is assigned to a CM stick, then a colon follows and then the number of the CM stick. The specified stick must be plugged in to activate the license.

Example: FSUV7-GASMM-SYNH4-HM774-STYXX:3-1314000

Tickets for computers

The license can also be transferred to a computer.

Example: FSUV7-GASMM-SYNH4-HM774-STYXX:cmact

Select Activation Method

A license can be activated directly via the Internet or by E-Mail. The quickest way is the direct activation. If that fails, use the E-Mail method.

Perform the activation

Paste the ticket number into the input field and press "continue".

Direct

The license data is exchanged directly with our server and transferred to your system.

E-Mail

In the e-mail process, a file (.CaratCmRequest) to codemeter@famos-robotic.de. The processing is automatic. After a few minutes, you will receive a response with a file (.WibuCmRaU). Restart the License Wizard and select "Apply Response File".
